## PROFILE

Detail-oriented web developer with hands-on experience building and maintaining websites. Strong foundation in HTML, CSS, JavaScript, React, and Vue with experience working with databases, troubleshooting problems, improving site performance, and working collaboratively in teams. Successfully delivered interactive web features that increased user engagement by 24%.

---

## EXPERIENCE

### Front-End Developer – Local Surveyors Direct

Winchester, UK | Sep 2023 – Sep 2024

- Built and maintained web features for the company's member control panel, ensuring responsiveness and cross-browser compatibility for multiple user types.
- Supported the Drupal 10 migration by redesigning and testing front-end components to maintain brand consistency and functionality across 4 live customer-facing sites.
- Delivered UX improvements for the member control panel MVP, focused on accessibility (WCAG), and browser compatibility.
- Developed interactive cost calculators using React and Vue that increased user engagement by 24% across the main site and partner platforms.
- Worked in an Agile environment with regular sprint planning and collaborated closely with marketing, development, and stakeholder teams to ensure all project updates were aligned with business goals.

### Junior Developer – MG Connections

London, UK | Nov 2022 – Sept 2023

- Improved and managed the company's internal database system for record-keeping.
- Helped over 1,000 monthly visitors find IT support and troubleshooting information more easily by simplifying user journeys.
- Reviewed customer feedback, tested new website features, and reported any functionality issues to the software team.

---

## PROJECTS

### BookMySpot – Parking Reservation Platform [LINK](#)

London, UK | Oct 2024 – Dec 2024

- Built full-stack web application using React, Node.js, and MongoDB connecting drivers with parking space owners.
- Implemented calendar-based bookings, user authentication, secure login system, and real-time rating feedback.
- Developed custom REST APIs, added client-side form validation, and tested components using Jest and React Testing Library.

### HotelHive – iOS Hotel Booking App [LINK](#)

London, UK | Oct 2024 – Dec 2024

- Developed hotel booking app for iOS using React Native and Expo Go with clean UI and cross-platform performance.
- Used Firebase and MongoDB for user data, booking records, and real-time updates.
- Built staff admin panel to manage bookings and customer information.

### SecurePark – Web Security Audit

London, UK | Feb 2025 – April 2025

- Tested parking platform for security vulnerabilities using OWASP Mutillidae and identified input injection issues.
- Wrote comprehensive security improvement plan based on OWASP Top 10, focusing on API hardening and data validation.

---

## EDUCATION

### MSc in Web & Mobile Development Technologies (Distinction)

London, UK | Sep 2024 – Oct 2025

Northumbria University

Relevant modules: Web Security, Mobile App Development, UI/UX Design, Cloud Computing, Web Engineering

---
